AI and Career essentials

SUMMARY

I am a budding researcher at the Intersection of Social Sciences and Data Science. I am dedicated to advancing knowledge at the crossroads of social sciences and data science, focusing on addressing pressing societal issues such as social inequality and community development.

I actively seek opportunities to apply my knowledge in real-world settings whether collaborating with local non-profits to analyze community needs.

I thrive in environments that challenge thinking and foster innovation, to grow and gain more exposure as I learn, relearn, and unlearn things.

WORK HISTORY

Currently open to volunteering in organizations to put what I have learned to practice and also learn real work settings to have exposure to problem-solving, teamwork, and critical thinking.

SKILLS

- Public speaking- Art of effective communication and disruptive communication
- Data analysis- data gathering and visualisation using Power BI
- AI tools -Tableau, Runaway AI, Chat GPT
